RE: 02-278

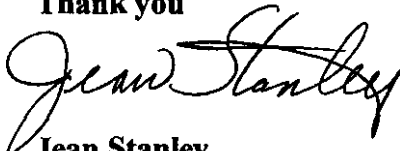

This is to inform **you** that I live in Indiana and we have a state's telephone privacy law, with it's no-call list, that works just fine.

It has been such a relief to have no unwanted calls at all hours, particularly the dinner hour and some late in the evening. I am an older citizen and was afraid I would somehow give them an OK on something I did not understand and get a large bill that they will say I owe.

We have received NO unwanted telemarketing **calls to** our home since the first of the year. And I strongly oppose any change in federal regulation that would result in a national no-call program less strict than our own state law.

I so value the peace and quiet the no-call provides.

Thank you
